

LIBRARY MATERIALS SELECTION

The Board of Education, as the governing body of the school district, is legally responsible for the selection of library materials, including the selection and approval of printed and non-printed materials for its use. Since the Board is primarily a policy-making body, it delegates to the following professional personnel of the district the authority for the selection of materials: teachers, principals, librarians, etc., under the leadership of the Superintendent of Schools.

In order to provide the Superintendent and his/her staff with guidance in the acquisition of instructional resource material, such as library books, references, audiovisuals, maps, etc., the Board endorses the guidelines approved by the American Library Association that such resources:

1. provide information that will enrich and support the curriculum, taking into consideration the varied interests, abilities, and maturity levels of the students served;
2. provide information that will stimulate growth in factual knowledge, literary appreciation, aesthetic values, and ethical standards;
3. provide information that will enable students to make intelligent judgments in their daily lives;
4. provide information on opposing sides of controversial issues so that young citizens may develop under guidance the practice of critical reading and thinking;
5. provide information representative of the many religious, ethnic, and cultural groups and their contributions to our American heritage; and
6. place principle above personal opinion and reason above prejudice in the selection of materials of the highest quality in order to assure a comprehensive collection appropriate for the users of the library.

The Superintendent shall be responsible for the selection of resource materials within the aforesaid guidelines. In implementing these principles, he/she shall:

1. consult reputable, unbiased, professionally prepared selection aids (such as the Horn Book, School Library Journal, etc.);
2. select material in which presentation and subject matter are suitable for the grade and interest level at which they are used;
3. select material cooperatively to provide for the needs and interests of the individual students;
4. consider two basic factors, truth (factual accuracy, authoritativeness, balance and integrity) and art (stimulating presentation, vision and creativeness); and
5. carefully balance the selection of materials of a controversial nature so as to include varying points of view in which students may develop critical reading and thinking skills.

In order to respond to any complaints about, or challenges to, the selection of library materials, the district has adopted regulations (1420-R, Complaints about Curricula or Instructional Materials Regulation) establishing a complaint procedure and providing for a committee to review such complaints or challenges.

If any person wishes to permanently remove materials from a school district library, he/she must seek the formal approval of the Board. The Board may determine that such materials should be removed. Such determination must not be based upon official suppression of ideas, but rather upon the educational suitability of the materials in question. Only the Board and/or the Superintendent may authorize said permanent removal of instructional materials, pursuant to the decision of the Board.
