

SPECIAL USE OF SCHOOL BUSES

The Board of Education permits some special uses of school buses, such as providing transportation to extracurricular events. To this end, the Board directs the School Business Official to review all requests prior to granting permission for any special use of school buses. The School Business Official is also authorized to approve use of school buses for special group purposes, upon request of the party or group seeking to use a bus for these purposes.

Permission for all such use may be granted based after review of such factors as the nature and legality of the use, the anticipated time a particular bus will be needed and the ability of the district to meet its normal transportation commitments.

Adoption date: February 12, 2008
